

Jason Ovalle

TECHNICAL SKILLS

Languages: Python, C, SQL

Tools: Git, Linux, GCC, Wireshark, VS code, Excel

Frameworks: PyQt5, NumPy, Matplotlib, Pandas, OpenPyxl

IT Support: Windows, macOS, Linux, classroom A/V, account access, device setup, DHCP, data management

EXPERIENCE

NMSU Office of Journalism and Media Studies, Las Cruces, NM

— *IT Work-Study*

Jan 2023 - May 2024

- Provided technical support to faculty, staff, and students for computer-related issues, including hardware troubleshooting, software problems, installations, and updates.
- Performed regular maintenance and diagnostics on computers, printers, and peripherals to keep classroom and office technology working reliably.
- Set up and configured new computers, printers, and other technology equipment across multiple campus locations.
- Responded to service requests, explained solutions clearly to end users, and helped reduce disruptions to teaching and learning activities.

NMSU Library NEH Grant Amador Project, Las Cruces, NM

— *Digital Archives Data Specialist*

June 2024 - July 2025

- Developed a Python automation tool to validate, clean, and flag archive metadata for a 15,000-page historical correspondence digitization project.
- Used Pandas, OpenPyxl, and pre-compiled regular expressions to check formatting rules across large Excel datasets and reduce manual review work.
- Added Excel error-highlighting features so librarians could quickly find metadata issues before upload or correction.
- Translated historical Spanish correspondence into English to support cataloging and scholarly access.
- Collaborated with a project team in a shared cloud drive environment, organizing, moving, and editing files across structured directories while following strict data storage and project documentation rules.

EDUCATION

New Mexico State University, Las Cruces, NM

— *Bachelor of Arts in Computer Science*

Aug 2022 - May 2026

Data Structures, Computer Security, Artificial Intelligence, Database Systems, Software Development

PROJECTS

NMSU Physical Science Laboratory Internship, Las Cruces, NM

— *Python, PyQt5, NumPy, Matplotlib*

Sep 2025 - Dec 2025

- As a team we built a Python tool to extract MS1 spectrum data from `.mzML` files and convert base peak and m/z-intensity values into structured JSON for analysis.
 - Generated Kendrick Mass Defect graphs and other matplotlib visualizations to help identify patterns in mass-spectrometry data.
 - Added CSV and PNG export features so processed spectral data and graphs could be reviewed, saved, and shared for research workflows.
-

LEADERSHIP

ARMY National Guard, Albuquerque, NM

— *Military Police 31B*

Jan 2017 - Nov 2022

- Held an active Top Secret clearance while serving
- Maintained accountability for serialized weapons and equipment through routine inspections, status checks, and armory audits.
- Registered and processed more than 400 people per shift in English and Spanish at New Mexico Department of Health COVID test sites.
- Managed vehicle and foot traffic flow across multiple lanes and checkpoints while coordinating with civilian and military teams.
- Worked efficiently as part of a team in high-pressure environments, using clear communication, role discipline, and follow-through to support mission objectives.
